

LIFE OR DEATH

THE FIRST 15 MINUTES CAN MAKE THE DIFFERENCE

ABOUT RESC-Q-ASSIST

A suitable solution for every challenge

When a person is injured, you often find that bystanders do not know first aid and therefore do not offer any assistance, this can be for a number of reasons, such as fear and not knowing what to do in an emergency situation. The Resc-Q-Assist is a new first aid and rescue system that includes easy to follow colour coded, illustrated instructions to guide you through the contents and help diagnose the right treatment to the patient. The Resc-Q-Assist allows everyone to come to someone's rescue.

WHY DO WE NEED A NEW FIRST-AID AND RESCUE SYSTEM?

During first-aid, time plays a decisive role, before we used to talk about the "golden hour", now we assume the "platinum quarter hour", which often makes the difference

between life and death. It could prove fatal if a first-aiders has to search for the first-aid kit or the right aid for too long, or even worse, if someone cannot gather the courage to start helping the person in need because they lack the knowledge or is afraid to administer the "wrong" help. Pressing the emergency alarm and waiting for the rescue team to arrive loses precious time. Resc-Q-Assist has developed a new first-aid and rescue system, which provide clear and exact instructions to the first-aiders about what has to be done. Supplied with an easy to use guidance system, providing short, comprehensive instructions.

LESS FEAR, MORE ORIENTATION

The new Resc-Q-Assist Q100 first-aid and Rescue System is more than just a first-aid kit. It is the first ever, first-aid box that puts itself in the position of an inexperienced first-aider and gives him/her the know-how as well as the assurance of an experienced rescuer. The Q100 comes with two add-ons, which overcome the psychological barriers and enable quick assistance.

FIRSTLY, THE UNIQUE RESC-Q-DISK, tells the first-aider exactly what needs to be done for each type of emergency. This disk illustrates different types of injuries and the corresponding colour coded actions required to treat the patient.

SECONDLY, THE COLOURS IN THE BOX lead the first-aider to the right aids and tools, which are packed in corresponding compartments, these are supplied with letters, allowing a person with a visual impairment to easily find the right treatment.

Q100

SIZE: 445 x 320 x 150mm

Resc-Q-Box: ABS-synthetic material, temperature resistant, shockproof, dimensionally stable, dustproof, waterproof, low-maintenance, transparent cover panel, smooth turn-lock fasteners, sealing device.

Contents: Resc-Q-Assist Colour Coded System, Resc-Q Disk, Wall Frame.

Q50

SIZE: 320 x 220 x 130mm

Resc-Q-Box: ABS-synthetic material, temperature resistant, shockproof, dimensionally stable, dustproof, waterproof, low-maintenance, transparent cover panel, smooth turn-lock fasteners, sealing device with security seal.

Contents: Resc-Q-Assist Colour Coded System, Resc-Q Disk, Wall Frame.

Q25

SIZE: 280 x 195 x 120mm

Resc-Q-Box: ABS-synthetic material, temperature resistant, shockproof, dimensionally stable, dustproof, waterproof, low-maintenance, transparent cover panel, smooth turn-lock fasteners, sealing device with security seal.

Contents: Resc-Q-Assist Colour Coded System, Resc-Q Disk, Wall Frame.

HOW THE RESC-Q-ASSIST WORKS

Enclosed within the Res-Q-Assist is the helpful Resc-Q-Disk.

The disk is illustrated with images to help the first-aider identify the injury and the treatment required.

By moving the arrow on the disk to appropriate image, it will indicate

the coloured fields in the Resc-Q-Assist and the actions that need to be taken to treat the patient.

HIGH-QUALITY CASE

Made from ABS-synthetic; approved for medical equipment, pharmaceutical product and consumer products. Dimensionally stable, shockproof, temperature-resistant, water repellant, dustproof, regrind-free, with cadmium-free colouring.

SAFETY AND HANDLING

Smooth, firm turn-lock fasteners to ensure quick access; including an all-around seal to protect the contents.

WALL HOLDER

The RES-Q-ASSIST can be removed quickly easily, thanks to the 90° stop-locking and can be opened from its wall frame.

USER-FRIENDLY

The colours on the Resc-Q-Disk and compartments inside are supplied with letters, enabling people who are colour blind to use the device effectively.

SAFE DESIGN

There are no sharp corners or edges, all parts are made of high-quality, solid and rounded ABS-synthetic material.

DURABLE DRESSING MATERIAL

Sterile bandaging material with CE label, manufacturing date and shelf life of 5 years – meaning the material can be stored for a long time, therefore extensive monitoring and replacement measures are not essential.

THREE SIZES

Resc-Q-Assist is available in three sizes - Q25, Q50 and Q100.

HANDLES

Strengthened carrier handles to help aid quick removal and support the weight when attached to the wall.
